

BLACKHAWK STUDIOS

The artists of Blackhawk Studios work predominately in ceramics and bronze. In addition to the custom work we do, we also offer "hands on" workshops to the public. Additional images and information is available on the Blackhawk website: www.blackhawk-studios.com.

We specialize in a series of art glazes, most notably our warm, brown "Honey" and our rich, cool "Copper Green". These glazes have been designed to flow so they accent the texture and relief detail of our tiles.

All Blackhawk tiles are handcrafted. Some serendipitous variation in the tiles and glaze is natural and serves to add a richness, liveliness, and uniqueness to the medium.

All of our repeating patterns have been designed to work exquisitely with these monochromatic art glazes. However, we also have a virtually unlimited range of colors of underglaze available and can offer polychrome versions of any tile pattern.

The acme of our strength, however, is our custom design. We can work with you or your decorator to design totally custom murals (for kitchens, fireplaces, entryways), accents (for doorways, patios, fountains) or running border patterns (for backsplashes, pool trim, hallways) and more! We can give your home, restaurant or office something truly personal and unique.
