

BLACKHAWK STUDIOS

Blackhawk Architectural Terra Cotta

Because our tile is handcrafted, the bas-relief can vary from very low to the very high relief of architectural terra cotta. We like to use architectural terra cotta to frame murals, and also use it around doorways and windows.

There are limitless ways to use architectural terra cotta. We can cut, bend, and form the clay to fit any space.

Terra Cotta can be fired with glaze or left as bisqueware. We use both red and white clay bodies, and can mix clay bodies for a marble effect, or glaze as faux marble.
